

The figure displays a 32x32 matrix plot, likely representing a correlation or similarity matrix between 32 elements. The elements are indexed from 0 to 31 on both the horizontal and vertical axes. The plot shows a strong diagonal relationship, with blue diamonds marking the main diagonal. Purple diamonds indicate off-diagonal relationships, which are concentrated in the upper right and lower left quadrants. Two large black rectangular boxes highlight specific clusters of elements: one from index 3 to 26 and another from index 11 to 31. The axes are labeled 'Element' and have tick marks for each of the 32 elements.
